### SOFTWARE DEVELOPMENT PORTFOLIO

---

#### AppTrack | [GitHub](#)

Technologies Used: JavaScript, React, Node.js, Express, PostgreSQL, HTML5, CSS3

- Member of a 4-person team building an application for reviewing the application and interview process of software-related positions
- Allows users to create a secure account, log applications and interviews, write reviews, and read posts from other job candidates
- Built for both mobile and desktop view using React with styled components

#### Amortization Calculator | [GitHub](#)

Technologies Used: JavaScript, Redux, HTML5, CSS3

- Calculates amortization metrics and displays them in a summary and a payment schedule
- Utilizes both state-based and functional components

#### PokéFind | [GitHub](#)

Technologies Used: JavaScript, Node.js, HTML5, CSS3

- Member of a 3-person team building an application for pulling information on various Pokémon characters
- Uses either a search bar feature or random generation to show several pre-determined features for a given Pokémon character

### WORK EXPERIENCE

---

SitusAMC, Atlanta, GA

December 2018 – December 2019

*Senior Analyst*

- Underwrote numerous office, multi-family, retail, industrial, and hotel properties for CMBS securitization ranging in size from \$5 million to \$40+ million
- Worked in a directly client-facing capacity
- Solely responsible for creating a metric reporting system that ultimately resulted in maintained compliance with federal regulations, thereby preventing the invalidation of a major client contract
- Used Excel and VBA to automate the calculation of property break-even metrics

The Sterling Organization, Palm Beach, FL

Summer 2017 – November 2018

*Analyst*

- Underwrote both stabilized and value-add retail properties
- Conducted due diligence for several acquisitions

Sensus Analytics, Atlanta, GA

Summer 2016 – Spring 2017

*Project Coordinator Intern*

- Worked directly with clients, distributors, and developers to coordinate analytics-based software projects
- Discovered and corrected critical errors in 48 projects with a combined value of over \$260,000
